Adaptive scheduling for performance, efficiency, and business impact

Storyline for Soumyendu

- ① Context and why this problem matters now
- ② Contributions to the scheduling problem
- ③ Why this sits at the HPC + ML intersection in industry
- ④ Exact MDP formulation
- ⑤ Common baselines and RL methods
- ⑥ Innovations in reward and features
- ⑦ Selected results and two communication pathways
- ⑧ Standalone NeurIPS workshop positioning
- ⑨ Bridge to hybrid cooling optimization for AAI

Why Scheduling Matters for Data Centers

Why RL for Scheduling?

RL learns policies that optimize cumulative impact, not just instant decisions

Thank You
